LAMB IN SEASON!

Sauces of all kinds a Specialty. Virginia Street, Reno, Nev. jan 17

NOVELTIES JUST PATENTED.

To prevent the stealing of whips from wagons a newly-invented whip socket has a lock which holds a clamp around the butt of the whip.

An Ohio man has invented a school desk in which the supports slide in two sockets in the base to make it adjustable for large or small pupils.

A recently patented nickel-in-the-slot machine polishes shoes, perfumes the clothing, opens a mirror and gives the user a stick of gum in one operation.

To assist in teaching a person to ride a bicycle a pair of handles is attached to the end of the horizontal saddle-post, to be grasped by the teacher to steady the wheel.

To iron the neckbands of shirts and set them in position a new machine has an iron ring with two flat wheels inside to be grasped by the band against the ring as they turn around.

To safely carry hats in trunks a new device has a base plate which screws into the bottom of the compartment to support a padded block, over which the hat is pressed.

To assist baseball pitchers in curving the ball a circular band of rubber, with sharp points projecting from one side to engage the ball, is slipped over one finger of the hand.

Padlocks are being manufactured with an auxiliary chamber, which carries an explosive, to be fired by a hammer inside the lock and give an alarm when the lock is tampered with.

THE WIT OF JUVENILES.

Teacher—"Fritz, tell me the name of the animal who furnishes us with hams?" "The butcher."

Aunt—"Well, Bobby, what do you want to be when you grow up?" Bobby (suffering from parental discipline)—"An orphan."

"Paw! Say, paw," little Johnny began. "Now, what do you want?" asked his suffering father, with the emphasis on the "now." "Will my hair fall off when it's ripe, like yours?"

A little girl on Long Island offered a rather remarkable prayer a few nights ago, when she said: "I do thank Thee, God, for all my blessings and I'll do as much for you some time."

"What is an average?" asked the teacher. The class seemed to be posed, but a little girl held out her hand eagerly: "Please, it's what a hen lays her eggs on." Bewilderment followed, but the mite was justified by the lesson book, in which was written: "The hen lays 200 eggs a year on an average."

A certain five-year-old boy who, in his earliest trousers, could only thrust his hands through his belt for want of pockets, had his heart rejoiced at last with a pair of trousers which had real pockets in them. His first act was to come down to a male relative with his hands stuck proudly in these pockets and to exclaim: "Look! I've got pockets with floors in 'em!"—Chicago News.

SOME ODD LITTLE FACTS.

An ordinance being enforced in Newbern, N. C., prohibits anyone, proprietors and employees included, from going in or out of a place of business between Saturday midnight and Sunday midnight.

Shakespeare's daughter, Judith, who was 22 when he died, survived him 46 years and became a Puritan. So rigid was she that she would never go near a playhouse, and was intolerant of everything theatrical.

Two daily newspapers are now printed by the Japanese in Formosa. One of them appears in Japanese only, while the other has articles in three languages—Japanese, Chinese and English, or what is intended to be English.

The supposed grave of Eve is visited by over 40,000 pilgrims in each year. It is to be seen at Jeddah, in a cemetery outside the city walls. The tomb is 50 cubits long and 12 wide. The Arabs entertain the belief that Eve was the tallest woman who ever lived.

Out in Redlands, Cal., they have been cutting grain this season with a harvester that is truly a mammoth of its kind. It has a cutting-bar over 50 feet in width, cuts the grain, threshes it, ties it up in sacks and turns out hundreds of these sacks an hour.

SHORT POINTED PARAGRAPHS.

Man is made of dust—or at least some wives think their husbands are.

Love is a disease that most people get just as often as they are exposed.

The woman who can't hold her tongue or a baby has no business with either.

No matter what a girl's political belief may be, she always wants protection.

Some men are so dense that about the only time they get next is in a barber shop.

A fool can do more damage in a minute than a wise man can undo in six months.

Travel often broadens a man's mind—also his stomach, if he can afford to stop at first-class hotels.

The style of house that will accommodate two families without trouble has never yet been constructed.

Some of the would-be actors who want to go on the stage should take the fast express; it would get them home quicker.—Chicago News.

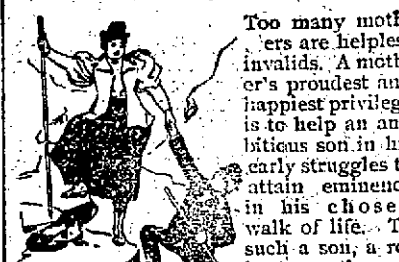

ABOUT WELL-KNOWN PEOPLE.

Gen. Lew Wallace has written a new book, consisting of two poems, dealing with oriental life.

Chauncey Depew expects to purchase a farm of from 200 to 300 acres within ten miles of Boston. He has not yet decided on the exact location.

Mrs. F. W. Packler, of Dayton, O., has fallen heir to an estate in Germany valued at \$20,000. Her title to the estate was established by a family Bible in her possession.

Rev. Mr. Saunders, a member of the eastern Ohio United Brethren conference, recently resigned because the conference decided that its members should not use tobacco.

Too many mothers are helpless invalids. A mother's proudest and happiest privilege is to help an ambitious son in his early struggles to attain eminence in his chosen walk of life. To such a son, a robust mother, a grand mother

with a healthy mind in a healthy body, a the best counselor and the best spur. Many mothers are sickly, fretful, helpless creatures tortured beyond endurance by the pains of their own wrecked constitutions. An ambitious youth receives but little encouragement or sound advice who appeals to such a mother. Most ill-health among women is due to weakness and disease of the organs distinctly feminine. If these parts are weak and diseased the entire system suffers.

The most wonderful remedy for all weakness and disease of the distinctly female organism is Dr. Pierce's Favorite Prescription. It allays inflammation, soothes pain and imparts vigor and health to these delicate organs. It makes healthy mothers and capable wives. It prepares a woman for motherhood. It does away with the discomforts of the expectant period and makes parturition easy and almost painless. Over 90,000 women have testified to its virtues in writing. Druggists sell it.

"It is with pleasure I recommend Dr. Pierce's Favorite Prescription to suffering ladies," writes Mrs. J. Ferguson, Box 29, Douglas Station, Selkirk Co., Manitoba. "After suffering untold tortures I thank God I found relief and cure in Dr. Pierce's Favorite Prescription."

It don't pay—sickness. Constipation often causes it. Dr. Pierce's Pleasant Pellets cure constipation. One little "Pellet" is a gentle laxative, and two a mild cathartic. They never gripe. They are tiny, sugar-coated granules, forty of which are contained in a two-inch vial. Druggists sell them and have nothing else "just as good." They regulate the Stomach, Liver and Bowels.

"Paw! Say, paw," little Johnny began. "Now, what do you want?" asked his suffering father, with the emphasis on the "now." "Will my hair fall off when it's ripe, like yours?"

G. W. Likens of Carson was a passenger for San Francisco last night.

Mrs. J. H. Kinkade of Virginia changed cars for the west last night.

Rabstaller's Gilt Edge beer at the Wine House. Always fresh and on draught.

Mrs. McGurn arrived from Virginia last evening and took the train for California.

Crockery, glassware, tinware and gataware lower than ever at Lange & Schmitt's.

Pearl gloss tooth powder is absolutely harmless. Sold by Reno Drug Company.

Leter is offering sweaters of all sizes and qualities from \$1 upwards. Now is the time to buy.

H. H. Forney, Assistant Master Mechanic at Wadsworth, paid Reno a short visit last evening.

Universal cook and heating stoves, and cheaper grades sold at cost to reduce stock at Lange & Schmitt's.

Henry Riter will receive ten dozen of Kapp & Street's excellent tamales this morning, which he offers at 15c each.

Nathan still has a lot of men's and boys' overcoats that he is making a leader of, and his prices can't be beat.

The largest assortment of artist-material in town at the Porteous Decorative Co.'s store on Virginia street.

The best floor and house paints in town are those mixed to order by the Porteous Decorative Co., Bureau Block.

E. M. Hostetter has located in the Reno Drug Company's store and will open a watchmaking and jewelry repair shop.

Hostetter, the jeweler located at the Reno Drug Company's Store, guarantees his work for one year. Prices reasonable.

All work done by Hostetter, the jeweler at the Reno Drug Company's Store, is guaranteed to be first class in every respect.

Pete Anker, the Danish Consul for Nevada, who has been visiting Reno for a day or two, will return to his home at Lovelock this morning.

The lunches at the Granite Saloon cannot be excelled and the beer is served ice cold. A choice stock of wines by the bottle or gallon.

If a good, wholesome meal is wanted there is no better place to go than Block & Klausen's Lunch Counter. Tamales at any hour, day or night.

Governor Sadler came in from his ranch yesterday and remained in town to-day. He reports his nephew's condition about the same.—Independent.

A company of Comstock miners who went to the Silver Peak mines to work have returned to Virginia owing to a discontinuance of work in the mine.

C. Novacovich has just received a carload of the celebrated Pioneer flour. He also has the chicken and oyster tamales in cans—something new and delicious.

E. Rosi, who is traveling for a San Francisco clothing house, was stabbed in the back by M. Foguarrelli on Friday near Dayton. The trouble arose over a dispute about \$1.

If oyster cockles are wanted, 'Thyes' is the place to go. He prepares them fresh every day, non-alcoholic, pure and delicious and made in any quantity. Upon tamales every night.

S. Emerich's new stock of dry goods, ladies and childrens jackets and capes, ladies and childrens underwear is as complete as most any store can furnish and prices are still the same as before the tariff came into effect.

Call at Muller & Stump's Pabst agency for fine California and imported wines for family and medicinal purposes. Sherry, port, muscatel, angelica and all dry wines by the gallon. Open every day until 8 o'clock.

W. H. Young is canvassing for several very pretty Christmas books, also Redpath's History of the United States. All of them are standard works and are very reasonable. He also takes orders for the Acome file, for properly filing papers and bills. The latter is a useful as well as a convenient device.

I have just received a complete and well selected stock of gents' furnishing goods, underwear, overshirts, socks, suspenders, handkerchiefs, ties, etc., which I guarantee to be equal if not better than any in the town, which I will sell at prices that defy competition. My stock of domestic and imported cigars and tobaccos is complete in every particular, comprising such brands as the Nerve, Carl Dunder and Royal in the 5-cent goods, and El Belmont, Saubez, Hays, De Vallens, Internations, Hotel Brunswick, General Arthur and many others in the imported goods. Call and be satisfied. Free employment office in connection with the store.

A. NELSON.

ADAPTATION OF DESERT LANDS TO FRUIT CULTURE.

(By Daniel Banell.)

If any apology is needed for a few straggling remarks in approach of this subject, let it be found in the likelihood of some general benefit accruing from ideas and views based upon long and practical efforts in irrigating fruit lands in the region of our country where all the characteristics of the desert are stranger and every feature of the irrigation system stands out prominently in its fullest importance.

While in the half desert lands, where supplemental irrigation multiplies the otherwise uncertain and accidental yields enormously, and transforms an otherwise disappointing region into a highly favored one, in the desert region there can be no farming in any form without irrigation and higher priced products that can bear wide transportation and find ready markets must compensate for the entire expense involved in their production. The silts and mounds of the prairie and the river valleys, largely sediments assorted out of the glacial drift by water during the Champlain age and fructified by the needed moisture to make the inherent plant food assimilable, will fill the grainaries and the markets with food for man and beast and feed countless millions, while the plateaus and mesas of the desert region, if irrigated, are eminently suited by reason of climate and favorable soil ingredients to produce the olive, fig, lemon and orange and the raisins and wine that can rival the best which the shores of the Mediterranean can offer to the world's markets.

Let this mere assertion stand as such until more time and space can be granted to me to fully prove it. Not for the first time in the long range of the ages has mankind reached out for the desert places of our forest continent; for all around us are proofs that in the far past, before Moses or Abraham were born, the same problems, that confront us in the evening of the 19th century, engaged the heads and hands of a race whose numbers must have been many times greater than those of the present dwellers in the land, and whose footsteps have worn tracks deep into the rocks of the canyons of the Colorado and Rio Virgin whose paths of more ancient date were cut off by newer gorges ages ago and tens of thousands must have traveled there where not one goes now; water ditches are found near rivers and streams, wholly petrified of which our present Indians have no tradition and in some large swamps, now impassable we find rock dams whose material must have been carried many miles. The history of that race is written in undeciphered hieroglyphics on a thousand and a half of their hundreds of feet above any now possible standing ground. No shadowy traditions of Indians and no skill of learned pale face has solved the silent and solemn mysteries that troop and throng around the doom of a mighty people who may have perished before some cataclysm of nature or under the terrors of a war of extermination.

We attack the same ancient problem, that of wresting subsistence from the desert, with better chances and with the forces of the modern world and with superior probabilities of conquering the mighty task. It is a great and multi-form labor worthy of the strong hand of a potent nation and of well planned massive effect instead of individual combat with gigantic obstacles and multiplied losses by failure, repeated to weariness, where there should be triumphant successes.

Some favored and populous states with varied other resources and small area of desert land may conquer their share of the problem with national aid, but the mostly or wholly desert regions of the interior will never be able to conquer alone. We need too many things that are beyond the means of a small state which is usually in a chronic condition of impecuniosity. We need in our work, which is a national and a continental one. First: An ample and intelligent literature elaborating in detail every phase of the great problem; we want the engineer and the inventor to give us improved devices for lifting water from deep sources, to give us more sensitive machinery for tilling our soils, cultivators, for instance, that will leave irrigation furrows in their wake as well as mellow the soil and destroy weeds, we want a reasonable land survey of classified available lands, we want the geologist to search out the drainage surfaces of the moulded rocks and consequent water supplies now hidden, and last, we want expeditions to search the highlands of the Andes, the Australian deserts and the Indies for new food plants suited to our needs and we need each and all of the aids to agriculture that any nation ever had and any man or set of men can devise. If we should now ask the Government to appropriate \$10,000,000 for this work we might be regarded as lacking in modesty, but if the sum were made five times that amount it would abundantly repay itself in a few years and build up a great and prosperous and happy nation. Many changes may await us in the coming century, other forms of locomotion may largely obtain, new forces may increase our dominion over inert matter, but it is most probable that our subsistence will still be to derive from the soil of the globe, the dust of the rocks, by transposing the constituent elements of the inorganic world through the growth of plant life and the assimilation by nutrition to the animal and human organism. The soluble hydrocarbons and nitrates will in future, as heretofore, form the bulk of the body of animal and man and their derivation from the soil will be

Royal makes the food pure, wholesome and delicious.

the work of the farmer and horticulturist, with improved methods it is to be hoped, but resting in an increased degree on artificial irrigation. The chemist and the experiment station may yet succeed, in listening to the silent changes from inert matter in nature's laboratory to the completed form of food substance and to forms of sentient life, utility and beauty, in finding means to aid and accelerate the growth of plants and to augment the wealth and happiness of a progressive world.

THE FIRE BELL.

A Small Blaze in the Northern Part of Town Calls Out the Department.

The fire bell called out the department at about 3 o'clock yesterday afternoon, the occasion being a blaze in a small stable on the rear of the lot at the corner of Sixth and Virginia street, the property of James Burke. The brick residence was unoccupied and the only theory that can be given as to the cause of the fire is that boys have been seen in the stable at various times and it is believed that they had been careless with matches or had thrown a lighted cigarette into the refuse in the stable and it had finally broken out into a flame. The stable was a total loss, but could probably be rebuilt for \$75. The fire boys kept adjoining property from catching on fire so that the damage is comparatively slight. It served to give the fire boys a practical drill and allowed Jim Carroll to drive his new horse.

Recognized Ability.

Dr. Albert A. Michelson, head professor of physics of the University of Chicago, has been elected to the international committee of weights and measures. The honor is one of the greatest among scientific organizations. The Chicago scientist did not even know that he was considered. He fills this vacancy caused by the death of Benjamin F. Gould, United States representative for the last ten years. Membership is for life. Dr. Michelson has cabled his acceptance.

The task of the committee is to secure for the world uniform methods in standards of weights and measures. Fourteen nations are now included in the union. Part of the task has already been accomplished by Dr. Michelson himself. In 1892 he was called to Paris by the French Government to determine the length of the meter. He accomplished the task in a year. The length was determined by wave lengths, on which Dr. Michelson is the greatest living expert. Dr. Michelson is a brother of Mrs. H. Bergman of Reno.

Washoe's Tax Roll.

The following is taken from the Assessor's roll covering the valuation and the taxes as returned by the Assessor for the year 1897:

Value of personal property upon which taxes have been collected by Assessor	\$136,440
Total valuation charged to County Treasurer	4,693,975
Valuation assessable property	\$4,830,415
Upon which taxes are due and collectable and distributed as follows:	
State and county	\$92,743 96
Polls	4,245 00
University and incorporation	14,108 26
Reno school bond redemption	3,092 73
Wadsworth fire bonds	682 47
Wadsworth school bonds	1,137 51
Total tax	\$116,009 93

The above shows the totals of the State and county and the several special revenues as far as Washoe county is concerned. There will be, as there always is, a small delinquent list, which will, of course, reduce the above figures in a measure.

Excitement at Lovelock.

The action of Marion Howell of Lovelock in tampering with a little girl has created great excitement in that town and vicinity. For a time it looked as though a lynching bee was inevitable. The Lovelock Constable, so it is reported, kept the mob off of the prisoner by firing a shot and threatening the crowd with his pistol until he could get Howell into safe quarters. Howell waived an examination and was taken to Winnemucca pending an examination before the Grand Jury. Howell is an old resident of Humboldt county and at one time was highly respected. Just what induced a man of his age and experience to place himself in this questionable position is hard to conjecture.

A Card of Thanks.

Mrs. J. M. North and family wish to return thanks to their many kind friends in Reno, who so kindly gave their sympathy and assistance during their recent bereavement.

Mrs. J. M. NORTH.
Reno, Nev., October 26, 1897.

SOME USEFUL HEALTH NOTES.

Burns are promptly relieved by brushing the burned surface over with much sage.

Neuralgia is speedily relieved by applying a cloth saturated with essence of peppermint to the seat of pain.

Bowel trouble, so common in hot weather, can be cured by drinking a strong tea made with blackberry leaves. This remedy is perfectly harmless and always effects a cure.

Sore throat and even diphtheria can be cured by swallowing dry sulphur. In case the patient is a child who objects to swallowing the sulphur it can be blown from a paper into the throat.

Corns may be cured in a short time by binding on a piece of fresh lemon, which should be allowed to remain on all night. After a few applications the corn will separate from the healthy flesh.

Pain in the back caused by a strain or kidney trouble is soon relieved by placing a towel across the back wet with alcohol and water in equal quantities, over this place a dry towel and let them remain on all night.

For severe coughs and colds saturate flannel with camphorated oil and turpentine and apply to the chest. Use two parts of the oil to one part of turpentine. This relieves the soreness of the chest and the cough soon subsides.

For severe cuts and lacerated wounds the best remedy known is tincture of calendula, and, if used in time, there need be no fear of lock jaw. Add half a teaspoonful of the tincture to half a cup of water and keep the wound moist with the lotion.—Home Magazine.

BOOKS, MAGAZINES, AUTHORS.

Mrs. Burton Harrison has written a new novel of New York life, entitled "Good Americans," and it will appear in Century during the coming year.

George Moore's "Esther Waters" has recently won an enthusiastic patron in Tolstoi, who is presenting copies of the novel to his friends, and has written to the author congratulating him upon the work.

The German edition of Mr. Edward Bellamy's "Equality" is to be followed shortly by an Italian edition. Although the book was published only recently, it is now appearing in four countries and three languages.

The readers of Maxwell Grey's well-known novel, "The Silence of Dean Maitland," will be interested to hear that another work from the same author is now in the course of preparation and will be published in October.

Jules Verne is at work on a novel of which he says the scene is laid "through the whole United States." It will not be ready for two years to come. Verne has also written a continuation of Edgar Allan Poe's "Adventures of A. Gordon Fynn."

Victorien Sardou, the French dramatist, was intended to be a physician, but he was so poor that he had to give Greek and Latin lessons at 20 cents apiece. He was also a bookseller's hack and made translations. It is stated that he was once paid less than \$6.50 for a translation which took him three weeks to do.

IN THE WHIRL OF FASHION.

The things most noticeable in new millinery is the disappearance of ruchings and the presence of folded and swathed bands.

A stunning picture hat is of gray silk tulle, the brim composed of row after row of tiny tucks which took three days to complete. Gray plumes and a white osprey feather complete this work of art.

Fur coats will have jeweled buttons this season to add to their costliness. Heavy outdoor garments will be lined with glace silk rather than broadens. The smartest creations, however, are lined with white satin.

High collars must be very high with handkerchief points and frills at the back. Every spare bit of fur can be frilled with lace or chiffon and feather flowers added. These flowers are a novelty and are expensive.

The low-cut bodice this winter will be worn with very long sleeves made tight-fitting at the wrists by means of loops and jeweled buttons, the sleeves spreading out around the hand like the petals of a flower. Fullness at the top of the sleeves should be reduced to a minimum.

A hat which is pretty, but rather startling to conservative eyes is of pale blue straw trimmed with blue ribbon edged with black. It is held in on the left side with a bunch of cherries and on the right side is a vividly blue kingfisher holding a bunch of cherries in his bill. This hat made its appearance on a London stage.

RECENT FOREIGN HAPPENINGS.

Lord Roseberry is said to have bought the late count of Aquilla's villa at Fossillo, near Naples, and to intend to spend his winters there with his children.

A British pauper, aged 70 years, came into a small inheritance lately and treated his friends to a champagne supper at a swell London hotel. It killed him within three days.

In repairing a cable off Cape Frio, a whale was found entangled in it by the cable ship Norsergan, but it had not broken. The whale must have been there two or three weeks and had been bitten into by sharks.

Prince Victor Emmanuel of Naples is said to be an expert electrician. He experiments on all its applications to light, sound, motive power, and photography, and was one of the first persons in Italy to investigate the Roentgen rays.

Gen. Bourbaki's father, who was captain of a Greek infantry at the time of Napoleon Bonaparte's expedition to Europe, conveyed to him the message from his brother Joseph that took him back to Paris and brought about the coup d'etat of the eighteenth of Brumaire.

Violin Lessons.

Professor David Wolf of Carson has commenced the winter term of his violin class in Reno. All those desiring his services please leave word at Sol Levy's dry goods store. 10-27w1
